

**Amendment to the Specification**

On page 3 of the specification, please amend paragraph [0011] as follows.

--[0011] The chassis frame 1 allows for access to the interior of the computer chassis from multiple sides for ease of component installation. The frame 1 includes two load-bearing surfaces on rails 11 that border the top of the frame 1. The rails join a front frame 15 to a rear frame 16.. Each of the rails has several rounded portions 12. The frame 1 shown in Fig. 1 includes three pairs of oblong rounded domes 12 distributed evenly along each of the rails 11. Alternatively, fewer or more domes 12 may be used in particular implementations of the invention.--
